Subject Index

Acquired brain injury, 289–299
Adherence, 345–349
Adolescents, 121–130, 141–147, 301–312, 313–322, 389–391
Assessment, 289–299
Asthma, 345–349
Attitudes, 367–375

Behavior modification, 267–271
Behavioral intentions, 367–375
Body image, 141–147
Bone marrow transplant, 169–178
Brain injury, 289–299

Cancer, 67–76, 121–130, 141–147, 169–178, 207–214, 267–271, 357–366
Cardiac defects, 219–228
Chemotherapy, 333–340
Child attribution, 323–332
Child Behavior Checklist (CBCL), 111–120, 179–185
Childhood chronic illness, 5–15
Child-rearing practices, 131–140
Children, 33–43, 79–86, 229–238, 257–266, 345–349
Chronic illness, 179–185, 257–266
Cognitive development, 197–205
Coping, 17–27, 219–228

Dental setting, 17–27
Diabetes, 179–185, 239–247, 313–322
Diagnosis, 87–98
Disabilities, 87–98, 99–109, 367–375

Family functioning, 377–388
Family income, 197–205
Family systems, 57–65

Hazard identification, 157–163
Hemophilia, 45–56, 57–65
Home environment, 197–205
Human immunodeficiency virus (HIV), 45–56, 57–65

Icelandic children, 187–195
Illness behavior, 187–195
Illness concepts, 187–195
Immunization, 249–256
Infants, 249–256, 345–349
Injuries, 33–43, 229–238, 323–332
Intervention, 17–27, 29–30, 31–32, 207–214, 351–356, 393–399
Intracranial tumors, 279–287

Late effects, 333–340
Leukemia, 333–340
Low birthweight infants, 197–205
Low income, 345–349

Maternal depression, 351–356
Maternal intelligence, 197–205
Mental disability, 87–98
Metabolic control, 239–247, 313–322
Mothers, 249–256, 257–266, 351–356, 357–366

Naturalistic methods, 323–332
Neonates, 351–356
Neurology, 45–56
Neuropsychology, 45–56

Pain, 149–154, 249–256
Parental adjustment, 207–214
Parental psychological distress, 5–15, 345–349
Parental support, 99–109
Parents and professionals, 87–98
Peer relationships, 169–178, 279–287
Posttraumatic stress disorder, 357–366
Prader-Willi syndrome, 111–120
Preschoolers, 149–154
Presurgical preparation, 149–154

Qualitative methodology, 79–86, 87–98, 99–109

Risk appraisal, 33–43, 229–238
Risk taking, 157–163, 229–238

Sickle cell disease, 131–140, 301–312, 377–388
Social desirability, 367–375
Social support, 121–130
Socioeconomic status, 345–349
Stress, 219–228
Survivorship, 357–366

Television, 157–163, 165–168
Toddlers, 149–154
Treatment acceptability, 267–271, 345–349
